

Yuna Lee

Address: 8-45 Jeungga-ro 20na-gil, Seodaemun-gu, Seoul, Republic of Korea

Phone: +82 (0)10 5632 1964

Email: yuunalee1050@gmail.com

OBJECTIVE

Full-stack developer skilled in both human linguistics and programming languages, with strong communication abilities

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

Python, Java, Golang (Including Algorithm Development)

DATA PROCESSING & CLOUD PLATFORMS

MySQL

BACK-END DEVELOPMENT

Java, Spring Framework, Spring Boot, RESTful API

FRONT-END DEVELOPMENT

JavaScript, HTML, CSS, Vue.js, JavaScript ES6, AJAX

EDUCATION

2018 - 2022

Hankuk University of Foreign Studies

Bachelor of Arts in English Linguistics and Language Technology (ELLT)

Relevant Coursework:

- AI Language Learning: Explored natural language processing and machine learning models for language acquisition
- Discourse Analysis: Analyzed context and meaning within linguistic structures
- Speech Processing: Studied techniques for analyzing and processing speech data
- Data Mining: Gained expertise in extracting patterns and processing linguistic data

2022 - Present

Yonsei University, Graduate School of Education

Master of Arts in English Education (Thesis Pending)

Relevant Coursework:

- Human Behavioral Psychology: Examined behavior and cognition related to language acquisition
- Language Acquisition: Researched human language learning mechanisms

- Corpus Analysis: Conducted corpus-based linguistic analysis and statistical methods
- Statistical Methods for Thesis: Acquired statistical techniques for research design

2024 - Present

Samsung Software Academy For Youth (SSAFY) - Technical

Stack Training:

Java, Spring Framework, MySQL, RESTful API, JavaScript (including Vue.js, React), Node.js, Three.js, Vercel, Python (Flask)
